CE

Advantages at a glance

The SMB Electronic Motor Brake provides fast, smooth & frictionless stopping of a three induction phase motor, by injecting controlled DC current to the motor windings, after the mains contactor opened.

- Preventing mechanical wear
- Reducing stopping time of high inertia loads
- Adjustable braking time
- Auto stop - DC Injection stops when motor stops
- DIN Rail mounting (Standard 10A, option 17-58A)
- Easy installation & operation

Standard ratings

- Voltages: 230, 400, 460 & 600V (105-390A are available up to 690V)

Settings

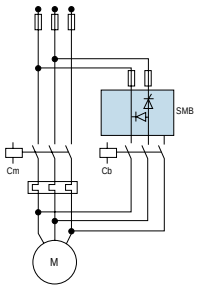
- Braking Torque - Determines the DC current level injected to the motor windings
- Two operation modes
  - Auto Mode: DC Injection stops automatically when motor stops.
  - Manual Mode: DC Injection stops after the pre-adjusted braking time. This mode can be used to "hold" the load at stand still.

Displays (LEDs)

- Mains voltage connected
- Braking Contactor Closed
- DC Injection On

Applications

- Circular and band (flywheel) saws
- Machine tools
- Fast stopping of high inertia loads
- Safety brakes (as long as mains supply remains on)



CE

Advantages at a glance

- Soft start & Soft stop
- Built-in bypass
- Start / Stop by voltage free contact
- End of Acceleration contact, one-N.O (31-58A only)
- Compact, small foot print
- Plastic case 8-22A, Aluminum case for 31-58A
- DIN Rail mounting (Standard 8-22A, option 31-58A)
- Cost effective

Standard ratings

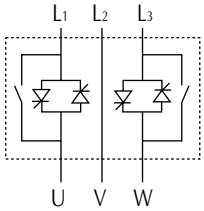
- Voltages: 230, 400, 440, 460 & 600V
- 50 and 60 Hz

Starter Protection

- SCR protection by Metal Oxide Varistors

Displays (LEDs)

- On - mains voltage connected
- Ramp - voltage is ramping up / down
- Run - motor is running



Applications

- Light duty motors in commercial applications
- Small conveyors (post office, supermarkets, etc.)
- Electrically driven gates
- Machine tools
- Appliances

RVS-BX
Basic Soft Starter 8-58A, with a built-in bypass

RVS-BX

KW 400V	Starter Type Ampere	Dimensions (mm) W	H	D	Wt. (Kg)
4	RVS-BX 8	65	190	114	1.2
7.5	RVS-BX 17	65	190	114	1.2
15	RVS-BX 31	120	207	105	2.1
22	RVS-BX 44	120	207	105	2.1
30	RVS-BX 58	120	207	105	2.1

Advantages at a glance

- Three phase control
- Soft start & Soft stop
- Built-in bypass (except for 8A)
- Start / Stop by voltage free contact
- End of Acceleration Relay, one-N.O contact
- Compact, small foot print
- Aluminum case
- DIN Rail mounting (option, only for 8-17A)
- Cost effective

Standard ratings

- Voltages: 230, 400, 440, 460 & 600V
- 50 and 60 Hz

Option

- Single phase motor soft starters

Starter Protection

- SCR protection by Metal Oxide Varistors

Displays (LEDs)

- On - mains voltage connected

Applications

- Pumps, Fans, Compressors
- Conveyors & Monorail systems
- Machine tools

Dealers, contact us for quantity discount and / or special design features

HCC
Horizontal Crane Controller

SEM-N
for Naval & Military applictions

RVS-AX
Analogue Soft Starter 8-170A, with a built-in bypass

RVS-AX

KW 400V	Starter Type Ampere	Dimensions (mm) W	H	D	Wt. (Kg)
4	RVS-AX 8	120	232	105	2.6
7.5	RVS-AX 17	120	232	105	2.6
15	RVS-AX 31	120	232	105	2.6
22	RVS-AX 44	120	232	105	2.6
30	RVS-AX 58	129	275	185	5.0
37	RVS-AX 72	129	375	185	5.0
45	RVS-AX 85	129	380	185	8.4
55	RVS-AX 105	129	380	185	8.4
75	RVS-AX 145	172	380	195	11.8
90	RVS-AX 170	172	380	195	11.8

Advantages at a glance

- Soft start & Soft stop
- Current Limit
- Built in motor Protection
- Built-in bypass (31-170A only)
- Start / Stop by voltage free contact
- Compact, small foot print
- Aluminum case

Standard ratings

- Voltages: 230, 400, 440, 460 & 600V
- 50 and 60 Hz

Motor & Starter Protection

- Electronic overload
- Phase loss
- Starter over-temperature
- SCR protection by Metal Oxide Varistors

Displays (LEDs)

- On - mains voltage connected
- Ramp Up / Down
- Run
- Overload
- Phase Loss
- Over Temperature

Auxiliary Relays

- End of Acceleration Relay, one-N.O contact
- Fault Relay, one-N.O contact

Applications

- Pumps
- Compressors
- Fans & Blowers
- Conveyors & Monorail systems
- Starting from weak power supplies (diesel generators, long supply lines, etc.).

Digital

RVS-DX
Digital Soft Starter 8-170A, with a built-in bypass

RVS-DN
Digital Soft Starter 8-2700A, Heavy Duty, Fully featured

* When using bypass contactor, add 160mm for bus-bar extensions.

Available Voltages
230V, 400V, 500V, 600V, 690V, 1000V

Advantages at a glance
- Small footprint
- Complete line 8-170A, 220-600V
- Third generation microprocessor based design circuitry
- Normal duty, fully rated design including built in bypass
- Aluminum case
- Superior starting & stopping characteristics
- Comprehensive Motor Protection package
- RS 485 Modbus Communications
- Frequency autotracking 45-65Hz
- User friendly
- Unique optional features including: Analogue output and additional future enhancements

Standard ratings
- Voltages: 230, 400, 440, 460 & 600V

Starting & Stopping
- Soft start & soft stop
- Current Limit
- Pump Control Program (See detailed description)
- Torque and Current Control characteristics
- Dual Adjustment
- Pulse start
- Slow speed forward and reverse

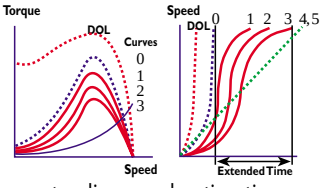
Motor & Starter Protection
- Too many starts
- Long start time (Stall)
- Shear-pin (Electronic Fuse for start & run)
- Electronic overload with selectable curves
- Under Current
- Phase loss & Phase Sequence
- Under, Over and No voltage
- Load loss (motor not connected)
- Shorted SCR
- Starter over-temperature
- External Fault (Programmable input)
- SCR protection by Metal Oxide Varistors

Displays
- LCD - Two lines of 16 characters each
- Multilingual - English, German, French & Spanish
- Four LEDs - On, Run, Ramp Up/Down, & Fault
- Statistical Data - Start, Stop & Fault parameters
- Full script parameter settings

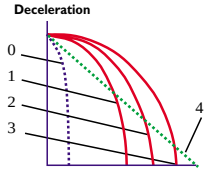
Controls
- Opto isolated inputs
- Auxiliary relays: Fault, End Of Acceleration or Immediate (programmable)
- Local and Remote reset
- RS 485 Modbus Communications for full control, display and programming
- Future enhancements: analogue In/Out card with Thermistor input, etc.

Pump Control (common for RVS-DN and RVS-DX)

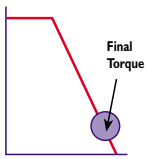
Start Curves
The RVS-DN (DX) incorporates an Intelligent Pump Control Program that allows selection between three special dynamic voltage ramp-up curves, and Torque or Current curves each further reducing peak torque thus extending acceleration time.



Stop Curves
When pumping to a higher elevation and motor is soft stopped, motor torque may quickly fall below load torque causing abrupt stalling instead of smoothly decreasing speed to zero. This will create a Water Hammer phenomenon resulting in a loud noise and damage to the pipe system. The Pump Control enables selection between 3 dynamic voltage ramp-down or Torque curves to prevent a stall condition and eliminate Water Hammer.



Final Torque
Prior to concluding the deceleration process, motor torque reaches a level where the load torque is higher than motor's torque and the valve closes. The motor continues to run against a closed valve (no load) until it stops. The Final Torque feature enables setting a point where the motor stops when the valve closes.



HRVS-DN
50-850A, 1500-13800V
Digital, Medium Voltage Soft Starter
Heavy Duty, Fully featured

Please inquire for our new catalogue.

Advantages at a glance

- Complete line 8-2700A, 220-1000V
- Heavy duty, fully rated design
- Robust construction
- Superior starting & stopping characteristics
- Comprehensive Motor Protection package
- User friendly
- Maximum ambient temperature: 50°C
- Unique optional features including:
  - Motor Insulation Tester
  - RS 485 Comm. Modbus / Profibus / TCP-IP
  - Thermistor input / Analogue output

Starting & Stopping

- Soft start & soft stop
- Current Limit
- Pump Control Program
- Torque and Current Control for optimized Starting & Stopping process
- Dual Adjustments - Two Starting & Stopping Characteristics
- Slow speed with electronic reversing
- Pulse start
- Linear Acceleration (tacho feedback)
- Energy Save for improved Power Factor

Motor & Starter Protection

- Too many starts
- Long start time (Stall)
- Shear-pin (Start+Run+Jam)
- Electronic overload with selectable curves
- Under Current with adjustable delays
- Phase loss & Phase Sequence
- Under, Over & No voltage
- Load loss (motor not connected)
- Shorted SCR
- Starter over-temperature

Displays LCD & LEDs

- LCD - 2 lines x 16 characters
- Selectable languages: English, German, French & Spanish.
- Two display modes for basic & advanced applications
- Friendly operation with Default parameters
- Eight LEDs for quick operational status
- Statistical Data including:
  - Total run time
  - Total number of starts
  - Total number of trips
  - Last start current
  - Last start time
  - Last trip
  - Current at trip

Options

- RS 485 Communication (see details below)
- Analogue Output (see details below)
- Thermistor Input (see details below)
- Motor Insulation Test (see details below)
- Preparation for Bypass - to maintain protection when bypass is closed
- Special Anti-Corrosive Treatment - special coating for harsh environments
- Illuminated LCD
- Special Tacho Feedback Circuitry

Communication (option)

- MODBUS RTU - enables Setting, Control & Supervision
- PROFIBUS DP - enabling Control & Supervision
- TCP/IP - MODBUS/TCP via standard RJ 45 computer network connector

Analogue card (option)

Incorporates two functions:

- Thermistor input, PTC or NTC
- Analogue output, related to motor's current, programmable as 0-10VDC, 4-20mA, 0-20mA or inverse

Motor Insulation Tester (option)

A unique feature for submersible pumps, motors installed in harsh environments, etc. The system measures motor insulation when motor is not running. Two programmable levels are available:

- Alarm level, adjustable 0.2-5 MOhm
- Start Disable level, adjustable 0.2-5 MOhm, preventing starting when insulation is below acceptable levels

Auxiliary Relays

Programmable relays, one-C.O 8A, 220VAC

- Immediate with adjustable On and Off delays. Can be dedicated for Shear-pin (Jam) protection.
- End of Acceleration, with adjustable On delay
- Fault, programmable as Fault or Fault-fail-safe operation.
- Low Motor Insulation Alarm (option)

Applications

Industrial

- Pumps
- Hydraulic systems
- Fans & Blowers
- Compressors
- Conveyors

Marine & Offshore

- Complete line 8-2700A, 220-1000V
- Heavy duty, fully rated design
- Robust construction
- Generator ready - auto frequency tracking, sustains variations of 45-65Hz while starting
- User friendly operation
- Unique protection for corrosive environments

The RVS-DN has Lloyds Type Approval for ENV1, ENV2 (Low Voltage to 1400A)

1000V for Mining, Quarry & Mixers

Digital, fiber optically controlled Soft Starter for 105-390A, Robust, Heavy Duty, Fully featured
